## ~ June 2015 ~

### New Members:

Ken Lee	May 1 <sup>st</sup>
Carl Freeman	May 4 <sup>th</sup>
Michael & Sara West	May 5 <sup>th</sup>
John Murphy	May 18 <sup>th</sup>
Stacey Wortham	May 29 <sup>th</sup>

**Ladies Red Shoe Tournament** ~ Our annual Ladies Red Shoe Tournament will be held Wednesday, June 10<sup>th</sup>.

This has been a great fundraiser for our golf course over the last few years with full support of the membership. There are several areas that we still need member help: on-course spotters during the event, pre-tournament setup personnel, and bag-loading staff the morning of the event, and other miscellaneous volunteers.

**Our Sympathy for Your Loss** ~ In the last two months we have lost two long term members and avid supporters of the club.

John Warren Entered Rest April 7<sup>th</sup> unexpectedly. He was a constant volunteer, past board member and multiple hole sponsor on the golf course. He will be missed by all his friends!

Frankie Johns headed to the Big Blue Nation in the Sky May 13<sup>th</sup>. He was a constant fixture around the golf course and through the years has played with about every group at the club. The UK cheering section will be much weaker now.

**Friday Night Couples** ~ The starting time for Couples Friday night golf has moved to 5:30 in hopes of more participation by our working couples.

### Note from the General Manager ~

Seen any Ball Marks on our greens? A mark fixed when it happens will repair in 1-2 days. Left untreated can take up to 21 days to repair itself. **If nothing else, please remember this** - push your ball marks back toward the center; **do not lift or twist** harshly. Ball marks can be fixed just as expertly with a two-pronged tool or tee by following these three simple rules:

1. **Shorten the tee/prong length to no more than 1/2" to 3/4"**. This can be accomplished easily where the forefinger acts as a base, with the thumb providing the pushing action.

2. **Push the ball mark from the back side first.** As a golf ball lands on a green, the "back" side of the ball mark will have the most turf displacement. This is where the most pushing should occur, and with some ball marks this is all that is needed.

3. **Push the ball mark from the sides.** The two sides of the ball mark can also be slightly displaced, so the second and third areas to push back are the sides. In some cases a small amount of twisting may be necessary, but under no circumstances should the turf be ripped toward the center. Also, the leading edge of the ball mark generally requires no pushing, as the turf has not been affected.

Please help us keep our greens looking their best.

*Brent D. Edmister, PGA General Manager*

### Upcoming Calendar of Events

<b>Ladies Red Shoe Tournament</b>	June 10 <sup>th</sup>
<b>4<sup>th</sup> of July - Club Wide Scramble</b>	July 4 <sup>th</sup>
